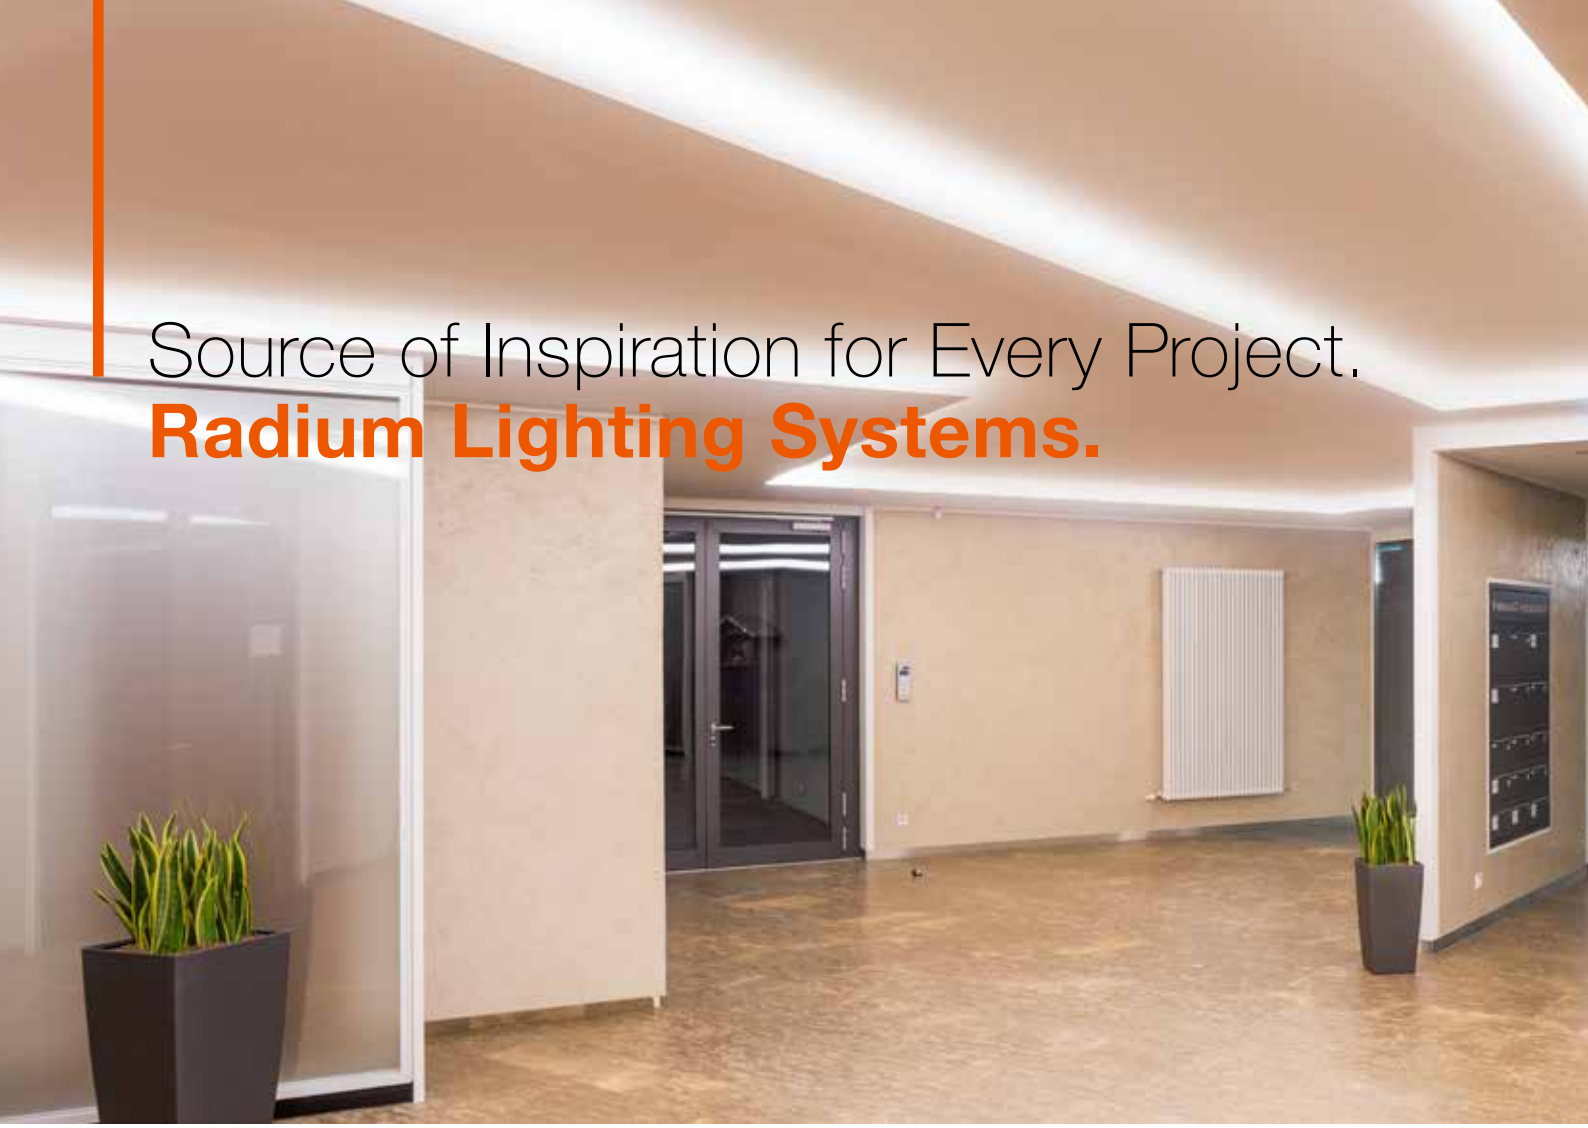
LED-Strips
2022

Future-proof, fully reliable,
functional customizing.

Flexible LED-Strips for tomorrow‘s lighting.

www.radium.de/en/led-strips



Source of Inspiration for Every Project. **Radium Lighting Systems.**

Flexible linear lighting systems

Linear lighting systems play an increasingly important role in modern lighting. The seamless light lines open up extremely versatile designs due to the variable adaptation to a wide variety of application areas. In addition, LED strips are significantly more efficient than fluorescent lamps and neon tubes and reduce energy and maintenance costs sustainably.

Get to know the Radium LED-Strip systems and let the excellent quality of our products convince you!

Efficient Allrounders

Radium LED-Strips will enable you staging your rooms optimally. As effective direct lighting, they elegantly provide uniform, high-quality light. By means of indirect lighting, the LED strips set decorative highlights and create a cozy atmosphere. Radium LED-Strips do not only convince indoors, but also in outdoor applications: thanks to their protection class, our robust, waterproof LED strips also demonstrate durability and reliable functionality outdoors. With the accompanying wide range of accessories, the lighting systems can be optimally accommodated to the application and easily installed. Whether LED strip, LED driver, aluminum profile, cover or mounting accessories – obtaining from us means: you get everything from one source.

Application examples:
- Architectural lighting
- Department stores
- Hotels, restaurants, bars
- Meeting rooms, foyers, entrance halls
- Effective outdoor lighting

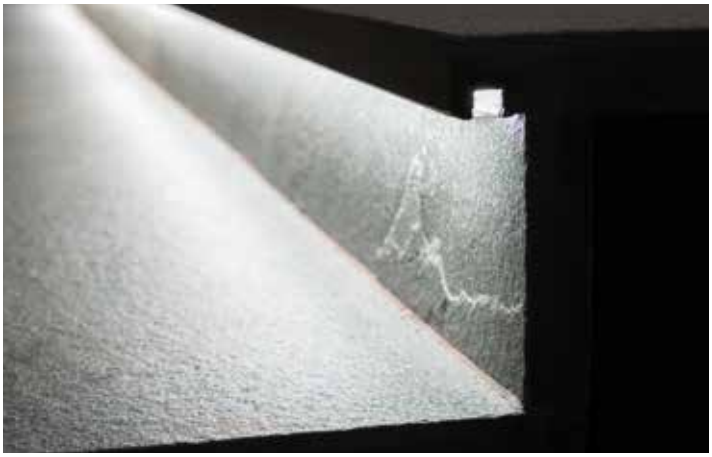
„Flexible LED-Strips from Radium are the perfect allround solution for modern lighting requirements.“

LED-Strips for Future-proof Projects.
Light in all its Facets.

Eye-catcher by modern lighting design

Today, modern LED lighting does not just provide brightness, but also takes on a whole lot of other tasks. Pleasantly homogeneous light has an aesthetic effect and fills every room with life. Forming of shadows is deliberately reduced. This creates a particularly uniform lighting atmosphere. And thanks to luminaires becoming slimmer and slimmer light sources stay modestly in the background. Their simple yet stylish look is supported by modern aluminum profiles or whole LED luminaires which disappear completely into coves, between shelves or showcases.



Form and functionality in harmony

With LED-Strips from Radium you can design projects of all kinds individually and flexibly. Thanks to their compact design, you can also find space in slim luminaires or narrow coves. This freedom of design enables you to set up elegant systems that are easy to install and connect. For outdoor installations no special devices are required, but they are also open to creative solutions.

Wide portfolio for versatile applications

Digital lighting is increasingly becoming a multifunctional design tool. Whether simple white lighting in different light colours or coloured light through RGB and RGBW technology, everything is possible. Tunable white and WarmDIM modules in combination with the appropriate light control create the perfect prerequisite for individual light colours with the best light quality. With a programmed course of daylight, the light can have an optimal effect on the human biorhythm. Solutions like this are used in Human Centric Lighting (HCL) concepts and thus make an important contribution to wellbeing, motivation and the ability to concentrate.

Full focus on good lighting.

You get matching plastic covers with a clear or matt surface for each profile. The professional covers do not only look good, they also ensure a fine light distribution with high efficiency.

Properly supplied – granted.

In the Radium portfolio you will find the right LED drivers for optimal operation of the LED modules and smart lighting control for demanding projects

Design, protection and cooling.

Our aluminum profiles are ideal for use with LED modules and offer a wide range of applications and design options.

Brilliant light, efficient and versatile.

The heart of the lighting solution is the LED module. Our broad portfolio does not leave anything to be desired for professional users. And in order to make the installation quick and easy, it would be best to order the fitting accessories in one go.

Design Advanced Rooms.
By Targeted Use of LED-Strips.

Wall coves
for indirect lighting
Wall-attached mounting
for decorative lighting
Wire suspension
for basic lighting
Under-surface lighting
for decorative accent lighting
Orientation light for decorative and functional lighting in one go

Plan Ahead, Implement Efficiently.

LED-Strips as Full Reels or Tailor-made System.

Flexible LED-Strips from Radium offer an extremely wide range of possible applications. But Radium also offers maximum flexibility in terms of scope of delivery to you: With either 5M Reels, 30M or 50M Big Reels and our customer-specific Individual Cut solutions, you are always well prepared for the wishes and requirements of your customers.

LED-Strips for every need

The portfolio of LED Star Strips makes each type available in three shipping options. In addition to our standard reels with 5 metres, you can also get extra long modules with up to 50 metres on a reel. When waterproof modules are needed, best let them be assembled by us, which saves time for you and you will get guaranteed quality directly from the manufacturer.

Use our online configurator for LED-Strips to plan your projects at www.radium.de/en/ledstrip.

Professional make-to-order and environmental protection

Would you like to reduce your assembly expenses? Then we would be happy to take care of the assembly of the components for you. Our employees will cut the LED strip, profile and cover according to your specifications. Every lighting system we assemble is subjected to a 100% final clearance. We calculate the cutting of the LED strip, profile and cover as well as the glueing-in of the strips as a package price. You can see the respective service numbers on page 11.

In the interest of environmental protection, we pack and ship the components with recyclable materials and try to do it without plastic if possible. So, even accessories such as mounting brackets and end caps are packed in paper bags.

5M Reels

Versatile, extremely energy-efficient and particularly long-lasting: Flexible LED strips are the clever all-round solution for a wide variety of lighting tasks today. So it's always good to have the fitting material in stock. With the high-quality 5M Reels from Radium, you can offer sophisticated customers the most modern LED technology for a wide range of applications. The standard market unit ensures both a lower storage risk and less tied-up capital and it also ensures high availability.

Your advantages

5 metre reel
- Customary units of measure
- Low storage risk and high availability

Big construction projects make you think big: You also need bigger numbers of LEDs, therefore, larger reels of LED-Strips. With the 50 or 30 metres long Big Reels, Radium offers you the latest LED technology for a variety of tasks – from general lighting to accent lighting – so that you don't have to spend a long time searching for the best and most economical lighting solution. And that with little wiring and minimal waste. So you enjoy maximum flexibility on the construction site and are always ready for your next LED lighting project.

Your advantages

50 or 30 metre reel

- Little waste
- Maximum operable length can be used without additional Strip to Strip connectors
- Saves space and packaging material

50/30M Big Reels

Service	Article no.
SERVICE CUT STRIP – Cutting the LED-Strip to size – Soldering a cable	DLRA2650
SERVICE CUT PROFILE/COVER – Cutting the profile and cover	DLRA2651
SERVICE CUT STRIP/PROFILE/COVER – Cutting the LED-Strip to size – Soldering a cable – Cutting the profile and cover	DLRA2653
SERVICE CUT AND MOUNT – Cutting the LED-Strip to size – Soldering a cable – Cutting the profile and cover – Mounting accessories and gluing in the LED-Strip	DLRA2652

Sometimes you just need tailor-made solutions that are a perfect fit for specific requirements. We manufacture flexible LED strips according to your individual length specifications. This enables you to plan important lighting projects particularly economically and precisely and then implement them extremely quickly on the construction site. Your personal contact at Radium will be happy to help you with your next lighting task.

Your advantages

Make-to-order with Radium

- Low installation effort
- Individual cuts
- Professional and ESD-protected processing
- 100% final inspection including functional test of the assembly

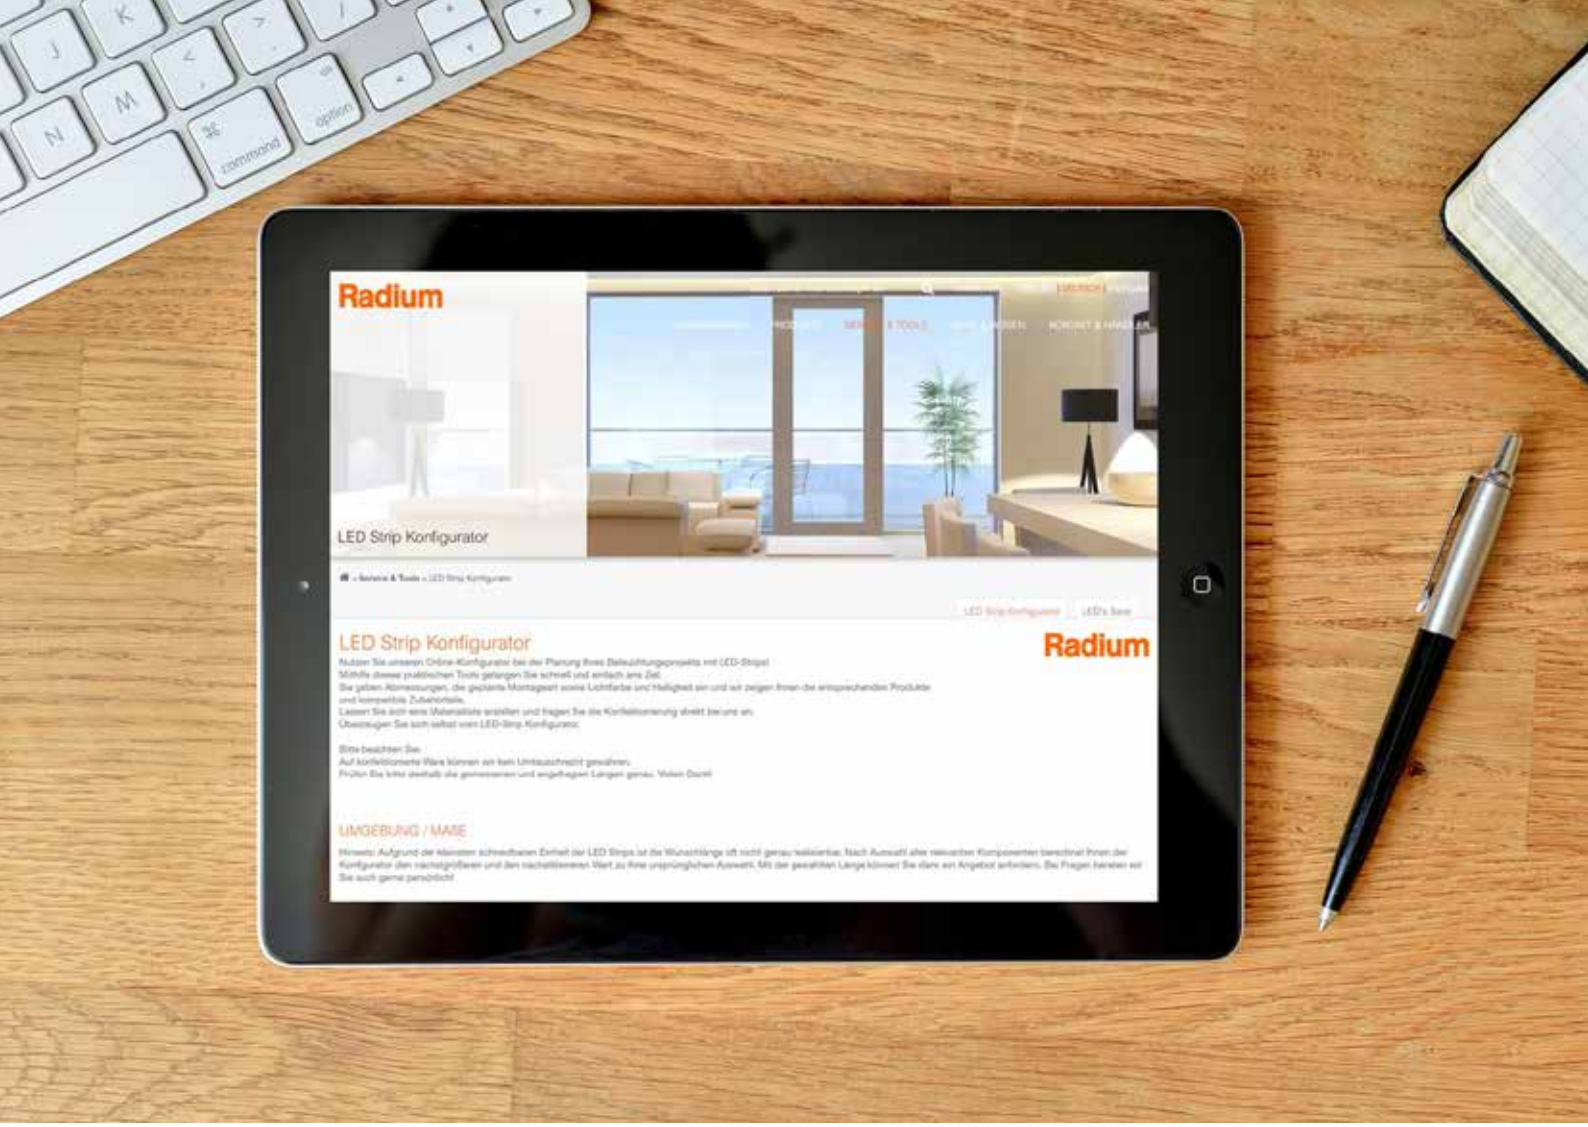
Note: The cable length is 0.5m as standard. Other lengths are available upon request.

Plan Projects Online.
The LED-Strip Configurator.

Use our online configurator when planning your lighting project with LED-Strips! With this convenient tool, you can reach your target quickly and easily.

You enter the dimensions, the planned type of installation as well as light colour and brightness and we show you the corresponding products and compatible accessories.

Get a material list and ask us about the assembly. Let yourself be convinced by the LED-Strip Configurator at www.radium.de/en/ledstrip.



„Efficient, flexible planning for your lighting project. It‘s so easy with the Radium LED-Strip Configurator. “

Innovative Lighting Design.
Realized with Radium.

The exterior facade of the ‚Green Building', an office building in Hanau, was highlighted in a spectacular light by means of waterproof RGB Strips. The strips were glued into a profile that was powder-coated in the colour of the building at the customer's request. Further, it was possible to attach it to the facade using specially manufactured mounting brackets. The lighting system is controlled via a complex DMX control system, with which each window section can be controlled individually and time-dependent scenes and sequences can be stored.

DRIVER 250W/24V IP67 OSRAM (page 82)

Butler XT2 (Driver)

When planning the lighting of the foyer, focus was on homogeneity. Different coves in the entire entrance area of the office building ensure uniform illumination. The indirect lighting was generated by means of an angle profile including diffuse cover, which emits the light of the strips at a 45° angle and so provides for even better distribution in the room.

LED STRIP 900 S 830/24V (page 20)

COVER SMALL F 16.4/4/C1 (page 66–67)

DRIVER FLAT 90W/24V IP20 RADIUM (page 82)

In the VIP area of Messe Düsseldorf, individually controllable accent lighting has been set up, which can be operated intuitively by using a smartphone or tablet. This project was implemented with RGB Strips that were mounted behind diffuse panes. The light lets the panes shine homogeneously in the programmed colours. Now, a Bluetooth Casambi controller makes it possible to store specific colours via password-protected access in order to highlight a customer event in the appropriate light.

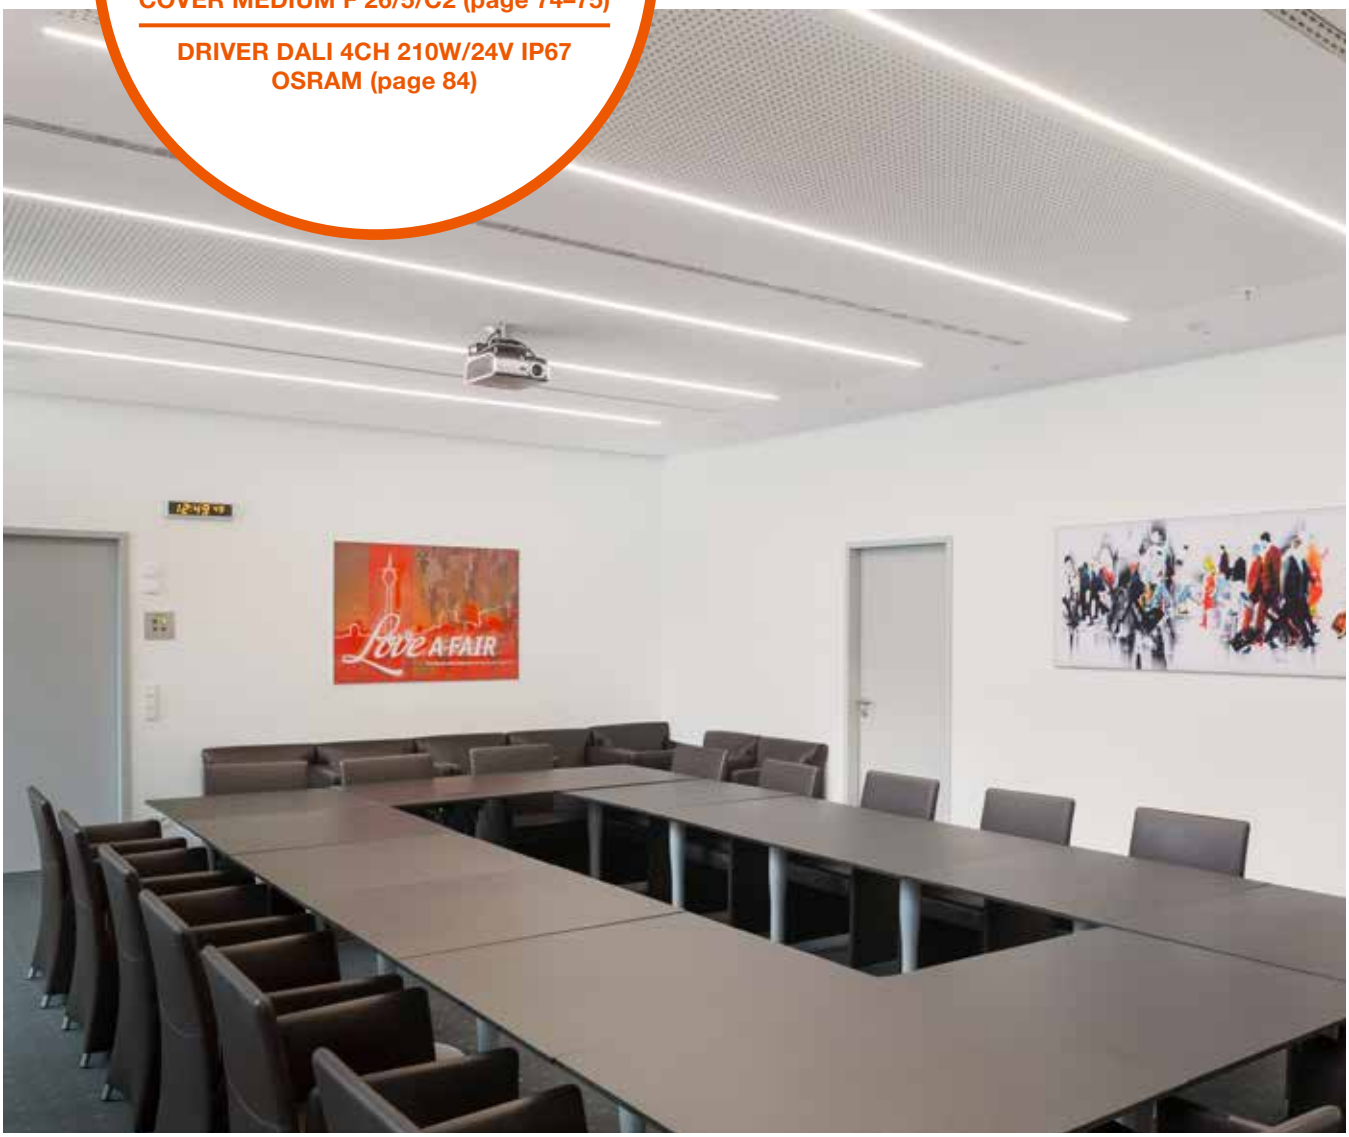
Thanks to the linear lighting solution, the conference rooms at Messe Düsseldorf sparkle in a uniform light. At the same time, the bright light of the LED strips provides adequate basic lighting for the rooms. The lighting was installed using an aluminum installation profile that was inserted into the plasterboard ceiling using mounting springs. Due to the symmetrical, linear arrangement of the lighting system, an optically high-quality impression of the entire room is created.



Products.
LED-Strips.

Whether indoors or outdoors, whether for general or accent lighting, whether for small, medium or large lighting projects, whether Star or Essence: The flexible LED-Strips from Radium are versatile, very durable and extremely energy-efficient. They convince both with high-quality materials and careful processing. And thanks to the small LED spacing, they ensure a homogeneous light distribution everywhere without creating shadows between the individual LEDs.

LED Star Strip 900 and 1500 WarmDIM

– 5 – YEARS GUARANTEE

– **Product features:**
– Very long lifespan: **60,000 h L70B10**
– Very good colour rendering: **R_a >90**
– Suitable for operation on **24 V DC**
– High colour consistency: **SDCM <3**

Advantages:
– Automatic adaption of lighting mood while dimming down
– Warm white light at 100% and super warm white light, when dimmed (4000–1900 K / 3000–1900 K)
– No need for two-channel DALI dimmer or any other control unit
– Optimized dimming curve for an accurate transition

Product features:

- Very long lifespan: **60,000 h L70B10**
- Very good colour rendering: **R_a >80**
- Suitable for operation on **24 V DC**
- High degree of protection thanks to high-quality full silicone encapsulation: **IP67**
- Extra strong hold thanks to 3M adhesive tape

LED Star Strip 1200 ZeroPitch Waterproof

Product features:
- Very long lifespan: **60,000 h L70B10**
- Very good color rendering: **R_a >90**
- Suitable for operation on **24 V DC**
- High degree of protection thanks to high-quality silicone encapsulation: **IP67**

Advantages:
- Continuous light line without any LED dots
- Perfectly suited for use in super-flat profiles
- Super flat, 3.5mm thin, fully encapsulated LED-Strip
- Cuttable every 25mm, feed-in connector and strip to strip connector available for an easy and tool-free assembly, without soldering
- Low glare compared to SMD LEDs
- Feed-in connector cables (500mm) pre-assembled on both sides

Please refer to page 80 ff. for further information on control gears, dimmers and accessories.
Please refer to page 88 ff. for further information on control units.

LED Essence Strip 1000 RGBW and 2200 Tunable White

Product features RGBW:
- Long lifespan: **30,000 h L70B50**
- Dynamic coloured light by RGB LEDs
- Suitable for operation on **24 V DC**
- Optimal function with multi-channel LED dimmers

Product features TW:
- Very long lifespan: **50,000 h L70B50**
- Variable colour temperature: **2700-6500 K**
- Suitable for operation on **24 V DC**
- Very high efficiency of up to **116 lm/W**

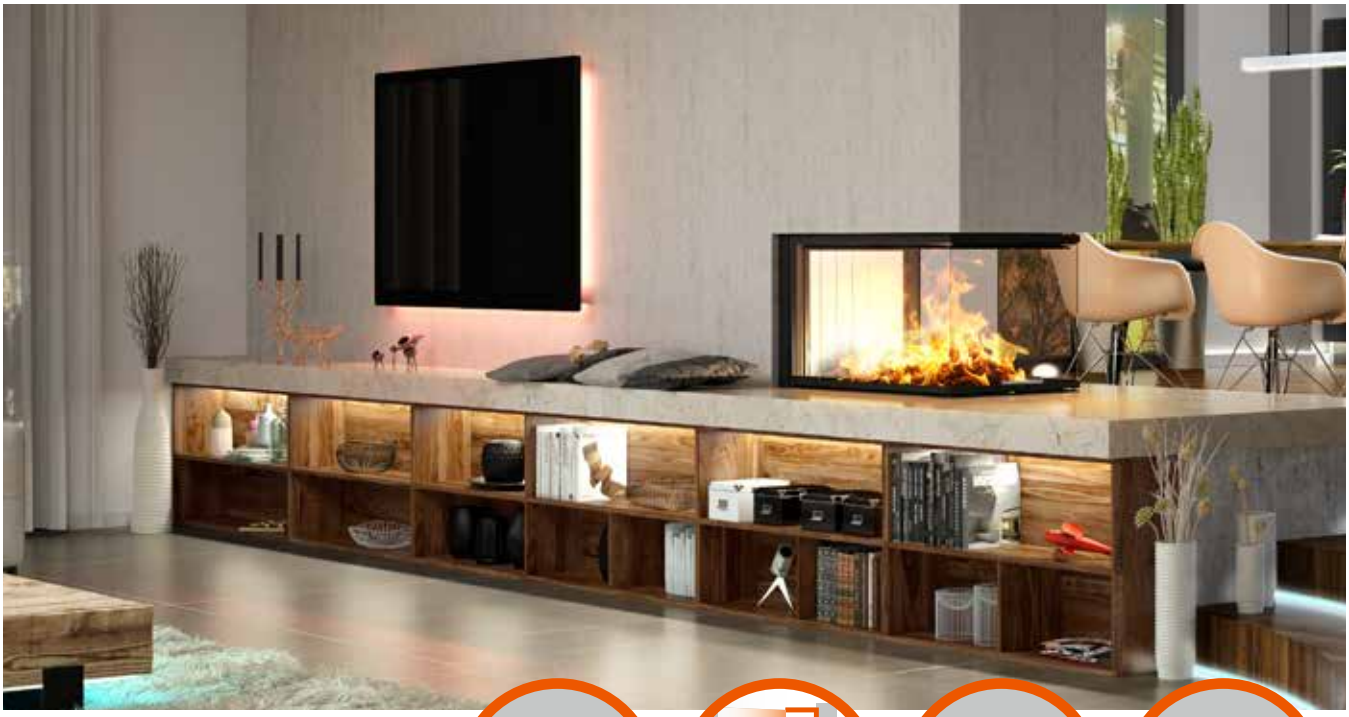
*Info: The product is available in three standard lengths (1m, 2m, 3m). The last digit of the article number represents the length in metres. Special lengths on request.

Attachment Profile SMALL U FLAT

Product features:
- High quality anodized aluminum profile with almost rimless light emission surface
- Extra thick base for the use of countersunk screws and for optimal heat dissipation
- Versatile installation options
- Simple and timeless design
- Optimal cooling and protection for LED-Strips



Mounting:
- Attachment with mounting brackets
- Attachment by screwing
- Wire suspension

Products.
Power Supply.

With the control gears offered by Radium you will find the right solution for every requirement indoors and outdoors. The energy-efficient, powerful and durable devices are designed for the operation of LED modules with constant voltage DC and they are easy to install. In combination with our LED-Strips, you can implement future-proof systems with high light quality and highest operational safety requirements.

Product features:
- Optimized and approved for the operation of LEDs for lighting purposes
- Protection against excess voltage and high temperatures
- For indoor and outdoor applications: protection class up to IP67
- Fully integrable into many building automation systems

Product features:

- Dimmable with conventional leading and trailing edge dimmers
- Very high compatibility with various dimmer models
- FlickerFree acc. to IEEE 1789 Standard (75W and 150W)
- Touch & DIM-interface (Dimming by wall switch without any additional accessories)
- Safety thanks to overload protection, overtemperature protection, overvoltage protection and short-circuit protection

Perfectly combinable with **LED Strip WarmDIM**:
Dim and adjust colour temperature without additional control!
More information on page 30.

*Note: With 24V input voltage

Dimmer RF 1CH:
- For dimming of single colour white LED strips up to 240W power (at 24V)
- Flat, compact design

Dimmer RF 4CH:
- RF dimmer for RGB, RGBW and white LED strips up to 5A or 120W power per channel (at 24V)

Our RF dimmers can be conveniently controlled by **Remote control**.
You will find these on page 95.

- Easy to connect (also several remote controls with one dimmer or one remote control with several dimmers possible)
- Fast response time
- Wide range thanks to RF technology

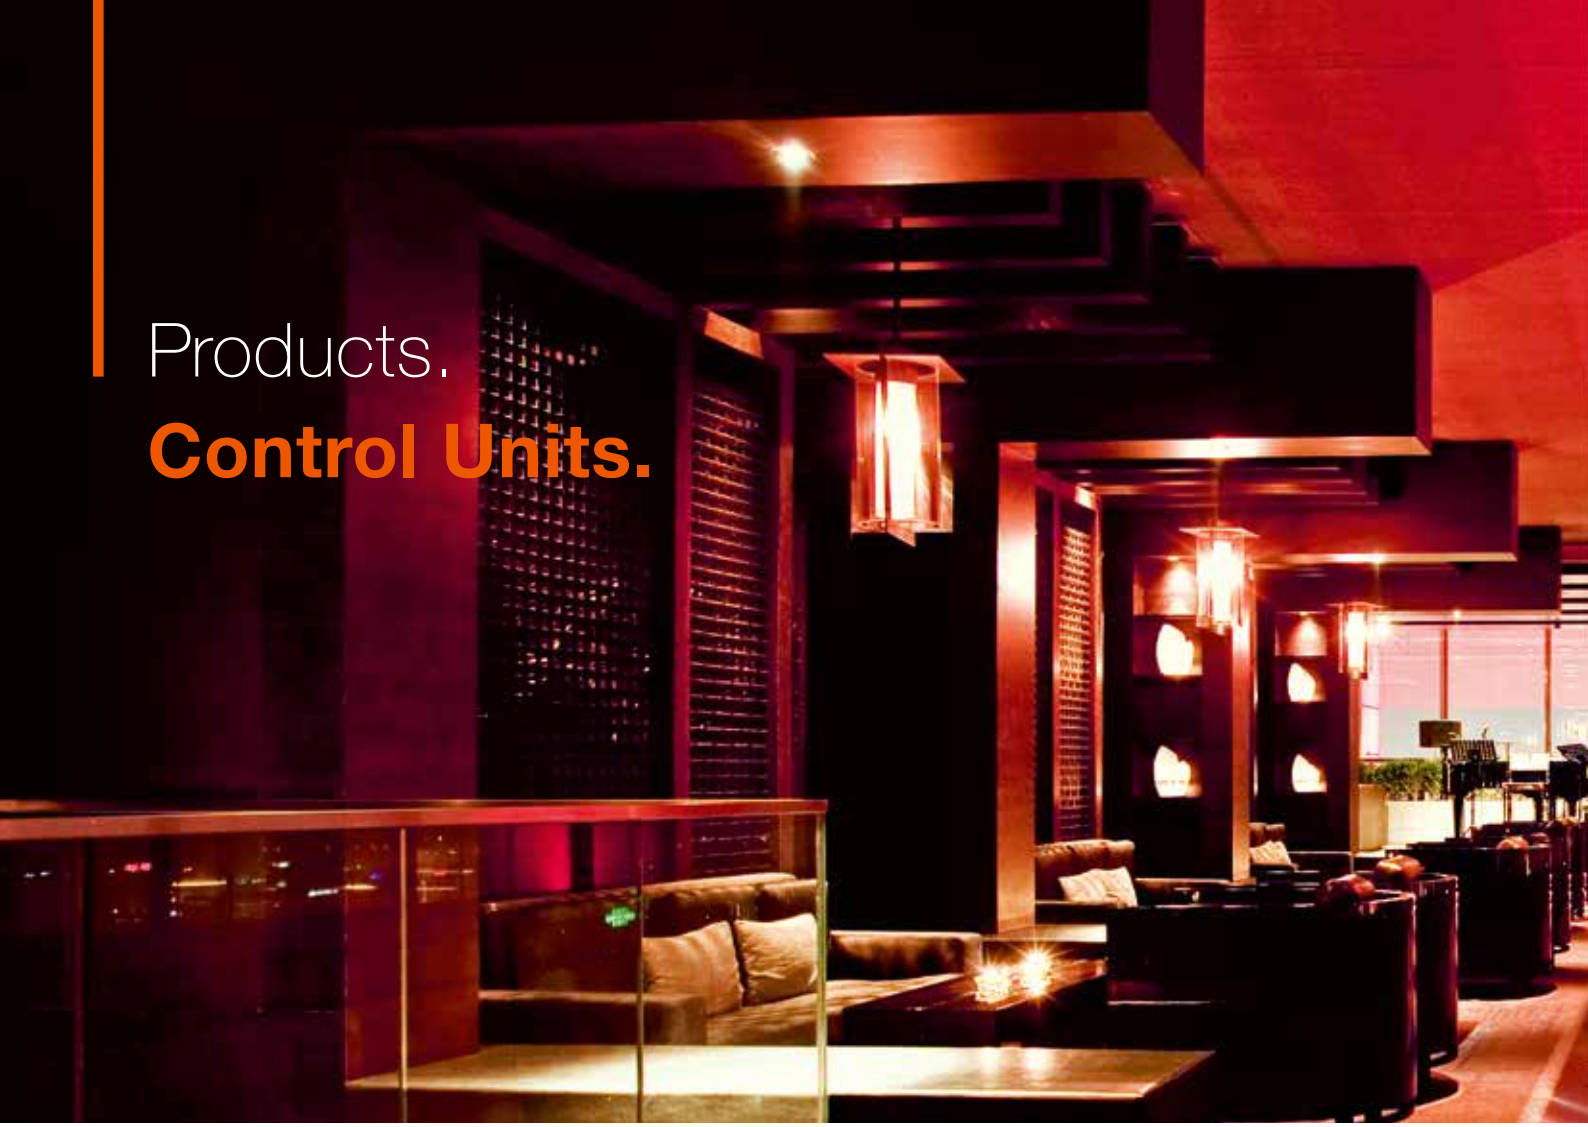
Product features:
- Powerful 4-in-1 Zigbee dimmer for RGB, RGBW, TW and white LED strips
- Dimmable up to 4A or 96W LED strips per channel
- For integration into smart home systems
- Control with the most popular voice controls like Alexa and Google
- Zigbee certified product



Products.
Control Units.

With the increasing demands in the course of digitization, our control units offer even more possibilities to you. They are easy to install, can be adjusted flexibly and operated intuitively. In combination with intelligent sensors and the use of daylight, you achieve maximum energy savings and use light in a targeted and needs-based manner. Make use of all of these options with Radium!

CONTROL **DALI** **ECO RTC** **32** / **230V** / **S1** **IP20**

- CONTROL – Product category
- DALI – Dimming interface: – DALI – 1-10V
- ECO RTC – Name of control
- 32 – Number of addresses
- 230V – Input voltage in volts (V)
- S1 – Sensor interface
- IP20 – IP protection

Smart Lighting Control

Product features:
- Can be combined with luminaires or control gears with suitable interfaces (1-10V or DALI)
- Setup of a conventional push button for control possible
- Colour control for DALI RGB or colour temperature control for tunable white light sources
- Compatible with all other Casambi devices
- Easy control via smartphone or tablet using the Casambi app

- Completely batteryless and wireless switch

Bluetooth Control Wall Switch 1-2CH
LMZA1736

Smart remote control

Product features:
- Freely programmable by Casambi app
- Setting the colour temperature of tunable white light sources
- Can be used as a wall switch on the magnetic holder or as remote control
- Compatible with all other Casambi devices

SMART Blue Remote white
LMZA0985

SMART Blue Remote black
LMZA0984

Dimmer for lamps

Product features:
- Direct dimming of 230V lamps without additional components
- Very well compatible with dimmable LED lamps
- Up to 150W can be conveniently dimmed with a BCU-TED

BCU 150/TED
LMBA0027

App

One app – many intelligent functions
- Light sources are found by the app
- Combine luminiares in groups and control them
- Create light scenes with individual dimming and colour values, e.g. warm, bright, romantic ...
- Timer function, e.g. Set alarm clock
- Mesh network: units communicate with each other, so that the Bluetooth range is expanded
- Scenes can be retrieved using the classic light switch
- Compatible with many iOS and Android devices (Bluetooth 4.0)

DALI Lighting Control

Product features:
- Control of white or tunable white light acc. to DALI Device Type 8 (DT8)
- Dimming and switching intuitively by hand
- Basic functionality even without configuration thanks to presetting
- Separate control of up to four groups possible
- Easy control of lighting via Bluetooth

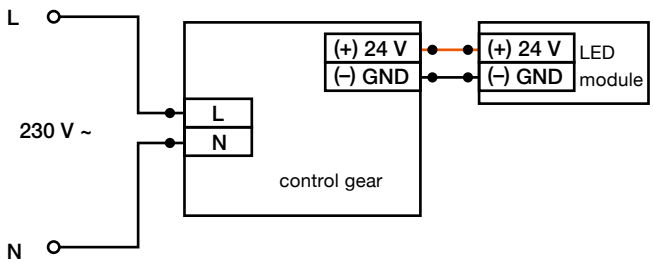
Overview of Important Information.
Technical Information.

Electrical information

Radium LED-Strips are suitable for operation with 24V DC voltage only. Suitable control gears can be found on pages 80–87. Depending on the LED strip, one or two supply lines per module are pre-assembled at the factory. The cables of the supply lines can be extended on site.



Cable lengths

The LED strips must not be operated at any random distance from the control gear. The maximum cable lengths depend on the device and are published in the technical data sheets of the control gear. When long cable lengths and/or high currents occur, sufficiently large cable cross sections must be used.

ESD protection

LED strips can be damaged by electrostatic discharge (ESD), up to a total failure of the LEDs. If the ESD damage is less serious, the LEDs remain conductive and light up, but darken quickly. To avoid ESD damage, LED strips must be stored in an ESD-protected environment and processed and assembled with appropriate protection. Therefore at our professional customising LED-Strip assemblies we work in areas with special ESD protection exclusively.

Assembly

All LED-Strips are equipped with 3M double-sided adhesive tape. After removing the protective film, the LED module can be glued to clean and smooth surfaces. Optionally, the modules can be installed directly in suitable aluminum profiles (see pages 60–75). Make sure you have a clean surface that must be free of grease, oil, silicone and dirt particles.

IP Protection

In order to protect our LED-Strips from environmental influences, all waterproof Essence Strips are enveloped in a silicone tube and potted at both ends. Our waterproof Star Strips are fully encapsulated with silicone. IP protection indicates the suitability of electrical equipment for various environmental conditions.

Degree of protection against dust and foreign bodies

0 Not protected
1 Protected against solid foreign bodies Ø
2 Protected against solid foreign bodies ≥ 12,5 mm Ø
3 Protected against solid foreign bodies ≥ 2,5 mm Ø
4 Protected against solid foreign bodies ≥ 1 mm Ø
5 Protected from dust
6 Dustproof

Example: IP67
Dustproof, protected against temporary immersion in water

Degree of protection against water

0 Not protected
1 Protected against dripping water
2 Protected against dripping water if the housing is inclined
3 Protected against water spray
4 Protected against splash water
5 Protected against water jets
6 Protected against strong water jets
7 Protected against temporary immersion in water
8 Protected against permanent immersion in water
9 Protection against water during high pressure/steam jet cleaning

Cooling

All Radium LED-Strips with a power of > 15 W/m as well as all RGB strips must not be operated without heat sink. Radium aluminum profiles are recommended for optimal cooling (see page 60–75). If the modules are not operated with approved Radium accessories, Radium cannot accept any warranty claims.

Maximum operable length

The specified maximum operable length of the LED-Strips requires an input voltage of 24V at the LED-Strip. If the voltage actually fed in is lower due to a too long supply line, the maximum operable length might be proportionately shorter.

Guarantee

Radium LED products are known for high quality engineering, professional thermal management, the use of high quality components and the use of systematic quality assurance measures. For LED-Strips that correspond to the product and application specifications given by Radium, e.g. data sheets, application notes or compatibility lists, Radium provides a guarantee up to 5 years. www.radium.de/guarantee

Star

Optimal function for professional use.
All Star types offer a longer service life and very good efficiency.

Essence

All Essence types offer pure functionality at the best price.

Most of our LED Star Strip products are ENEC certified by TÜV SÜD.
The corresponding products are marked with the ENEC logo.

The Meaning of the Symbols.
Pictograms.

W — Power consumption (W)

V In — Input voltage (V)

V Out — Output voltage (V)

V — Voltage (V)

A — Amperage (A)

°C Ta — Permissible ambient temperature (°C)

°C Tc — Permissible operating temperature (°C)

Hz — Mains frequency (Hz)

Dimensions length / width / height (mm)

h — Lifetime (h)

Protection class I

Protection class II

III — Protection class III

Shipping unit in pieces (pcs.)

EL G → A — Energy label

Material

Colour temperature
- 2700/3000 K (warm white)
- ~ 4000 K (neutral white)
- ~ 6500 K (cool white)
- super warm white–neutral white
- warm white–cool white
- RGB/RGBW

W/m — Power consumption per metre (W/m)

lm/m — Luminous flux per metre (lm/m)

LEDs/m — LEDs per metre

Smallest divisible unit of an LED-Strip (mm)

Max — Maximum operable length for the LED-Strip with one feed-in connection

5 m — 5 metre reel of LED-Strip

30 m — 30 metre reel of LED-Strip

50 m — 50 metre reel of LED-Strip

X m — Individual length for LED-Strip (m)

Distance (pitch) from centre LED to centre LED (mm)

Number of contact points of an LED-Strip

Width of LED-Strip (mm)

Cable length (mm)

Interface profile to cover

Interface profile to mounting bracket

Profile shape U (add-on/attachment profile)

Profile shape U FLAT (add-on/attachment profile flat)

Profile shape WING (installation profile)

Profile shape CORNER (corner profile)

1 metre length for aluminum profiles and covers

2 metres length for aluminum profiles and covers

3 metres length for aluminum profiles and covers

20 metres length for covers

Size SMALL for aluminum profiles

Size MEDIUM for aluminum profiles

DIM interface

Number of channels of a control gear

For Multi-Channel:
Max. number of addresses of a control gear
For broadcast:
Max. number of control gear

Number of poles

Number of outputs

Number of leads

Cable cross section (mm^2)
